#### **DETAILED ACTION**

Page 2

#### Terminal Disclaimer

1. The terminal disclaimer filed on 3/22/2005 disclaiming the terminal portion of any patent granted on Application Number which would extend beyond the expiration date of 20050088772 A1, serial number 10/691,752, has been reviewed and is accepted. The terminal disclaimer has been recorded.

2. The assignment document filed on 3/22/2005 is acceptable as the documentary evidence required by 37 CFR 3.73. If the assignment document is not already recorded with the United States Patent and Trademark Office, it is suggested that the assignment document be submitted for recording among the Office assignment records. See 37 CFR 3.11 and MPEP § 302.

## Response to Arguments

- 3. Double Patenting Rejection with regards to claims 1-22 is withdrawn.
- 4. Applicant's arguments, see page 7, second paragraph of Applicant Remarks, filed 3/15/2005, with respect to claims 1,4,10-12 have been fully considered and are persuasive. The 103(a) rejection of claims 1,4,10-12 has been withdrawn.

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 16, 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Feng et al. (US 6,529,342 B1).

Feng et al. discloses, at least one hard disk; at least one slider corresponding to each disk; a bias voltage source applying a predetermined bias voltage between a slider body and the corresponding hard disk, the predetermined bias voltage including a DC component and being based on a detected level of interference between the slider body and the hard disk. (col.4, lines 39-41, 52-67; col.5, lines 13-15; col.6, lines 6-25; 42-51 and as depicted in Fig.3).

As to Claims 20 and 21, Feng et al. further the predetermined bias voltage is applied to the slider body with respect to the hard disk and applied to the hard disk with respect to the slider body (col.4, lines 60-63; as depicted in Figure 3).

As to Claim 22 Feng et al. further discloses wherein the bias voltage source controls a magnitude of the predetermined voltage based on the detected level of interference between the slider body and the hard disk. (col.4, lines 33-38, col.5-col.6, Figures 4-12).

### Allowable Subject Matter

## 7. Claims 1-15 are allowed.

Independent Claim 1, is allowed over Prior Art, since the cited references taken alone or in combination do not teach or suggest the predetermined bias voltage including a DC component and an AC component and being based on a flying-height spacing of the slider body. Independent Claim 15, is allowed over Prior Art, since the cited references taken alone or in combination do not teach or suggest the predetermined bias voltage including a DC component that is based on a minimum variation of current that flows on and off the slider body as the DC component is varied.

Art Unit: 2651

8. Claims 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Muranushi et al. (US 5,153,785); Meyer et al. (US 6,577,466 B2); Chapin et al. (US 6,785,081 B2); Boutaghou et al. (US 6,888,693 B2); Riddering et al. (US 2003/0043497 A1); Riddering et al. (US 6,700,724 B2)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dismery E. Mercedes whose telephone number is 571-272-7558. The examiner can normally be reached on Monday - Friday, from 9:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on 571-272-7843. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
